

**TI.c Mass Balance Calculations for growers and grower/storers only**

A mass balance calculation is required to ensure all product leaving the farm is Red tractor accredited and that extra non accredited fruit is not being brought in to the site.

If you complete the records below to show the volumes per variety picked and volumes sent off farm.

|   |          |  |  |  |  |  |  |
|---|----------|--|--|--|--|--|--|
| Farm  |          |  |  |  |  |  |  |
| Variety   | e.g. Cox |  |  |  |  |  |  |
| Total field acerage (Ha)  |          |  |  |  |  |  |  |
| Total yield harvested tonnes or bin number                                  |          |  |  |  |  |  |  |
| Total weight put into storage (on farm) tonnes or bin number                |          |  |  |  |  |  |  |
| Total weight sent off farm tonnes or bin number (either storage or grading) |          |  |  |  |  |  |  |
| Total waste tonnes or bin numbers   |          |  |  |  |  |  |  |

N.B. Sites who also have packhouses need to ensure full traceability in line with BRC requirements.
